ADDENDUM NO. 1

PROJECT NAME: S. 6th STREET STORM WATER IMPROVEMENTS (KINGSVILLE CDBG-MIT 22-085-009-D237)

DATE: OCTOBER 20, 2023

This addendum should be included in and be considered part of the specifications for the project. The respondent shall be required to sign an acknowledgement of the receipt of this addendum and submit it with their proposal.

Addendum No. 1 is issued to provide responses to the following requests for clarification received in writing:

1. Question: Does the City have design plans for the 14 projects shown on the project map included within the RFP?

Response: The archaeological services will be for one location – S. 6th Street – not all 14 locations. The firm selected for award will be provided with design plans for that project site.

2. Question: What is the width of the project area along South 6th Street?

Response: The width of the project area along S. 6th Street is approximately 11.33 feet.

3. Question: Will the project take place entirely within existing right-of-way, or will new easements be required as part of the project?

Response: The project will take place on a TxDOT right-of-way for which a permit will be obtained.

4. Question: Would the City of Kingsville like the cost given as a lump sum or on a time and materials basis?

Response: The City would prefer that the firm propose a fee per deliverable with sum total for services.

5. Question: Is a planholders list being maintained?

Response: Since the information is provided online to the public there is no planholders list available.
